Who We Are

PT Bejo Kusumo Teknologi (PT BKT) is an Indonesian general contractor and integrated solutions provider for the energy and industrial sectors. We combine **contracting, supply, engineering and technology** to deliver a wide range of work scopes under one accountable partner — from procurement and installation to multi-discipline site works.

With a strong focus on **power generation** — steam (PLTU), geothermal (PLTP) and solar (PLTS) — and a base in the energy-rich **Wonosobo–Dieng** region of Central Java, we are positioned to mobilize quickly and to support clients reliably, backed by a digital work system that keeps delivery efficient, safe and fast.

Vision & Mission

Our Vision

To be a trusted national general contractor and technology partner that helps build and maintain Indonesia's energy and industrial infrastructure — reliably, safely and sustainably.

Our Mission

- Deliver contracting, supply and engineering with quality, safety and integrity.
- Support power generation (PLTU, PLTP, PLTS) and industry across any scope.
- Use digital systems to make delivery efficient, safe and fast.
- Advance renewable energy and sustainable solutions in Indonesia.

Core Values

Integrity

Transparent, accountable conduct in every engagement.

Quality

Standards-driven products and workmanship.

Reliability

On-spec, on-time delivery clients can plan around.

Safety (HSE)

A safety-first mindset for every worksite.

Innovation

Technology that makes work smarter and faster.

Sustainability

Commitment to cleaner, greener energy.

Power Generation Capabilities

Power generation is our core focus. We support owners, operators and EPC contractors across the full plant lifecycle — supply, construction, installation and maintenance — and are ready to take on any related scope of work.

| | | |
|---|--|--|
| <p>STEAM / COAL PLTU</p> <p>Mechanical, piping, electrical, insulation, civil & balance-of-plant support and supply.</p> | <p>GEOTHERMAL PLTP</p> <p>Steam-field & power-block support, fabrication, maintenance and specialized supply.</p> | <p>SOLAR PLTS</p> <p>Solar PV systems, installation, cleaning solutions, O&M and balance-of-plant supply.</p> |
|---|--|--|

 **Ready to support any scope of work.**
From single-item supply to full multi-discipline projects — delivered in-house and through a vetted partner network, coordinated by PT BKT as your general contractor.

Disciplines We Cover

| | | |
|--|--|--|
| <p></p> <p>Civil & Structural Site works, foundations, structures & buildings.</p> | <p></p> <p>Mechanical & Piping Fabrication, erection, valves & rotating equipment.</p> | <p></p> <p>Electrical & I&C Power, lighting, instrumentation & controls.</p> |
| <p></p> <p>Supply & Logistics Equipment, materials & spare-parts procurement.</p> | <p></p> <p>Maintenance & O&M Shutdown, overhaul & routine maintenance support.</p> | <p></p> <p>Digital Delivery Planning, monitoring & reporting on one system.</p> |

Products & Services

A broad, integrated portfolio lets clients consolidate procurement and works under one accountable partner — flexible enough to cover almost any project need.

| Supply & Procurement | Engineering & Construction | Renewable & Digital |
|--|--|---|
| <ul style="list-style-type: none"> • Industrial machinery, equipment & spare parts • Mechanical items — valves, piping, fittings & rigging • Electrical & lighting (incl. SNI-certified products) • Materials, consumables & general goods • Specialized & long-lead equipment sourcing | <ul style="list-style-type: none"> • General contracting & multi-discipline site works • Mechanical, electrical & civil works • Installation, fabrication & commissioning • Insulation, cleaning & maintenance services • Engineering & technical consultancy | <ul style="list-style-type: none"> • Solar PV systems (PLTS) & panel solutions • Micro-hydro (PLTMH) & clean-energy solutions • Digital platforms & work-management systems • E-procurement & reporting enablement • Technology integration for projects |

One partner, wide reach. With an established supplier network (domestic and international) and registered export customs access, PT BKT can source, build and deliver across a broad range of project requirements — standard or specialized.

Digital-Enabled Delivery

PT BKT runs on an integrated digital work system. It connects planning, procurement, execution and reporting on one platform — so every project is delivered more **efficiently, safely, concisely and faster**. This is a core advantage we bring to every client.

Efficient

Centralized data and streamlined workflows cut waste and rework.

Safe

Digital HSE checks and records keep worksites and compliance in control.

Concise

Paperless, standardized reporting that is clear and audit-ready.

Fast

Real-time tracking and quick coordination speed up decisions and delivery.

What Our System Covers

Project & Task Management

Plans, schedules and progress tracked live in one place.

Paperless Documentation

Digital forms, approvals and e-reporting for every job.

E-Procurement & Coordination

Faster sourcing and vendor coordination, fully traceable.

Our Competitive Advantages

1

True General Contractor

Ready to support any scope — supply, construction, installation and maintenance.

2

Power-Generation Focus

Specialized capability across PLTU, PLTP and PLTS.

3

Digitally Enabled

A smart work system for efficient, safe, concise and fast delivery.

4

One-Stop Partner

Contracting, supply, engineering and technology under one roof.

5

Strategic Location

Wonosobo–Dieng base for rapid mobilization to Central Java energy sites.

6

Broad Sourcing Reach

Domestic & international supplier network with export customs access.

7

Certified Quality

SNI-certified product lines and standards-driven workmanship.

8

HSE Commitment

Safety-led delivery suited to live energy and industrial worksites.

9

Sustainability Focus

Renewable-energy capability aligned to the energy transition.

10

Responsive & Reliable

Fast quotations, clear communication and dependable execution.

Legality & Licensed Scope

A fully registered Indonesian company with complete, verifiable documentation — ready for vendor registration and tender qualification.

Experience & Markets

PT BKT actively serves the power-generation and industrial market, with capability built around geothermal (Dieng region), steam, solar and broad industrial supply & services.

Markets We Serve

- Geothermal power & steam-field operations (PLTP)
- Steam / thermal power plants (PLTU)
- Solar PV programs & electrification (PLTS)
- EPC contractors & industrial facilities

How We Engage

- Registered vendor on energy e-procurement systems
- Tender participation for energy & industrial scopes
- Supplier partnerships for certified products
- Renewable-energy & technology initiatives

Our Delivery Approach

01

Assess & Plan

We scope the work, source the right solution and plan delivery digitally.

02

Mobilize & Execute

In-house teams and vetted partners deliver under one accountable coordinator.

03

Monitor & Hand Over

Real-time tracking, HSE control and clear reporting to project close-out.

Project references with client, scope and value are available on request and provided as part of formal tender submissions.

Compliance, Quality & HSE

Compliance

Registered PT with complete business, tax and labor documentation (NIB, NPWP, SIUP, BPJS).

Quality

SNI-certified product lines and traceable sourcing, with workmanship aligned to client specifications.

Health, Safety & Environment

Safety-first practices and digital HSE control for live energy and industrial worksites.

Our commitment. PT BKT delivers every engagement with integrity, documented compliance, and a safety-led, technology-driven approach — a dependable, low-risk partner for energy and industrial work.

Why Partner With Us

Lower delivery risk

Complete legality, certified supply and digital control end-to-end.

One accountable partner

Contracting, supply, engineering and technology in one place.

Faster, smarter delivery

A digital work system that keeps projects efficient and on schedule.

Future-ready

Renewable-energy and technology focus aligned to where industry is heading.
